

XM is the best. I drive all across minneapolis/st paul one of the most congested road system in the country the worst highway layouts in the U.S.A. Also averging 200 tornados in one summer. Its nice to know that im not going to get sucked up in one or when im rushing my wife to hospital and get stuck on a 5 year road construstion project on 94/694East. Knowing up to date traffic and weather is hte most ingenius thing in the world. Thank you XM. You keep me driving and paying \$2.02 a gallon for gas but thats ok.
